

Price Guide in US Dollars For AK Test Kits

Please note – the GB pound is very volatile against the dollar at this time, because of the political situation. These prices are based on GBP1.00 = USD 1.39, which is equivalent to USD 1.00 = GBP 0.73, but the price you pay may vary. Please check the exchange rate at the time of purchase, if you are concerned. The exact exchange rate used on your purchase is determined by the credit card company/bank at the time of purchase and is not within our control.

The exact price depends on the exchange rate on the day the order is processed, and is determined by the credit card company. Your card will be billed by the manufacturer in Great Britain. Carriage is charged by weight and is approximately 8% with a \$6.00 minimum. MasterCard, Visa, Amex and PayPal accepted.

The Protocol Kit has had several additions over time. The additions are available for purchase on their own for people who have already bought the protocol kit. Please contact us for more information.

** These kits have been expanded over the last few years. If you bought the kit some time ago, the easiest way to see if you need additional vials for that kit is to count the number of vials you already have and compare that with the number listed here. Then contact us for a price for any additional vials you need.

*** The influenza vaccination vial is updated every year in late fall in line with the current vaccine being used. You should update this vial and obtain a new mixed vaccination vial each year.
